### Profile 11-21-71

See OBC

CIRION is a leading provider of Central Laboratory and Assay Development & Validation services. We offer a complete range of analytical, logistical and project management services, and a broad portfolio of safety and specialized assays, including biomarker assays. Our team is committed to quality assurance exceeding industry standards to ensure reliable results and uncompromised service. CIRION is strategically located for the cost-efficient management of multinational trials. Our entire organization is focused on providing high quality flexible solutions to the pharmaceutical and biotechnology industries worldwide.

#### Expertise:

- Development & Validation of customized assays, including biomarker assays: exploratory, partial and full validation
- Biologics/Biosimilars (large molecules)
  - Pharmacokinetic (PK) assays (including ISR)
  - Confirmatory assay
  - Neutralizing Cell Based assay (NAB)
- GLP and non-GLP validation
- Extensive menu of methods:
  - Cell-based assays (NAB)
  - Immunoassays (ECL, MesoScale®platform)
  - Molecular Biology
  - Cytogenetics
  - Microbiology
  - Mass Spectrometry (QTRAP, Seldi-TOF ProteinChip)
- Central Laboratory fully dedicated to clinical development
- GLP-compliant, CAP/CDC accredited
- Expertise in multiple therapeutic areas

### Profile 71

Clinetica Biosciences International Inc. is a global management consulting and contract clinical research organization (CRO). We serve the needs of leading pharmaceutical research and biotechnology companies devoted to inventing medicines that allow patients to live longer, healthier, and more productive lives.

Clinetica Clinical Research (CCR) is the contract clinical research division within Clinetica Biosciences, Inc. that provides contract clinical trial management and CRO services to clients in the biopharmaceutical industry, government and academia. We provide high quality, customized clinical drug development solutions. We recognize that it is knowledge, not just data or technology that makes a contract research organization (CRO) an indispensable ally throughout all phases of drug development.

Clinetica Management Consulting (CMC) is the consultancy division of Clinetica Biosciences and provides independent strategy and management consulting services to emerging and established biopharmaceutical firms. Our mission is to enhance our clients' competitive advantage. At Clinetica, we have established an international group of partners and strategic alliances and draw on wide-ranging expertise to meet the specific needs of our clients. Clinetica's knowledge and expertise in health and medical science has been achieved through decades of experience within the biopharmaceutical arena. We provide planning and support services to emerging biotechnology firms and established private or public biopharmaceutical companies. In addition, we provide strategy development at the business and corporate level, independent due diligence and market research to biotechnology firms and potential investors in health sciences-based technologies.
