### Profile 14306:21

Vision Quest is Canada's largest producer of clean, renewable wind electricity; harnessing a power abundantly found in nature. Our primary customers are utility companies, and retail energy providers and organizations committed to making a difference. Together, we're making wind energy a major power source in Canada. (CanWEA Mbr)

### Products and Services

Vision Quest operates 182 wind turbine power plants and owns 84 megawatts of total peak capacity. Output from our facilities is enough energy to supply more than 35,000 homes annually. Vision Quest is a wholly owned subsidiary of TransAlta Corporation, Canada's largest non-regulated electrical generation company.

### Profile 14478:21

Viva Solar is a Canadian incorporated company with head offices in Toronto and production facilities in Krasnodon, in Southern Russia where major developments in solar science were made. The company has been manufacturing under Canadian supervision monocrystal silicon solar photovoltaic cells and modules since 1990.

### Products and Services

The production facility has an annual capacity of 800KWp and employs more than 70 skilled workers. The company has exported solar cells and modules for 10 years through an extended network of distributors in many countries under its own and OEM trademarks.
