Profile 21

Stock Symbol:

Rimon's mission is to develop novel wound healing, cardiovascular, and cosmetic products with a portfolio of "drug-like" medical polymers that can be developed and marketed within medical device timelines. Rimon's advanced medical polymers have broad therapeutic, drug delivery, surgical, and cosmetic applications.

Products and Services

Exclusive development of Theramers™ - synthetic polymers that combine bioactivity with mechanical and physical properties including: Angiogenic Theramer™ - induces new blood vessel development, or angiogenesis; MI Theramer™ - reduces the activity of matrix metalloproteases (MMPs), which degrade tissue; AM Theramer™ - destroys gram +ve and -ve bacteria.
